Downflow Booth Range

Clean Air & Containment

FOR HANDLING FINE POWDERS

Ensures operator protection when handling fine powders

Superior operator protection

Provide a clean, controlled, semi-contained environment for your workers and products with a downflow booth from Envair Technology.

Ideal for protection from hazardous powder handling applications, vapours, industrial processes involving hazardous dust shedding and for eliminating problems of cross-contamination.

Our range of booths are designed for dispensing, weighing and sampling fine powders including speciality chemicals, pharmaceutical and cosmetic products, food additives and colour pigments.

Achieve guaranteed containment levels of $<100\mu\text{g}/\text{m}^3$ plus unidirectional downflow velocity of $0.45\text{m}/\text{s}$ at the filter face.

Models to meet the requirements of ATEX hazardous area environments are also available.

KEY FEATURES

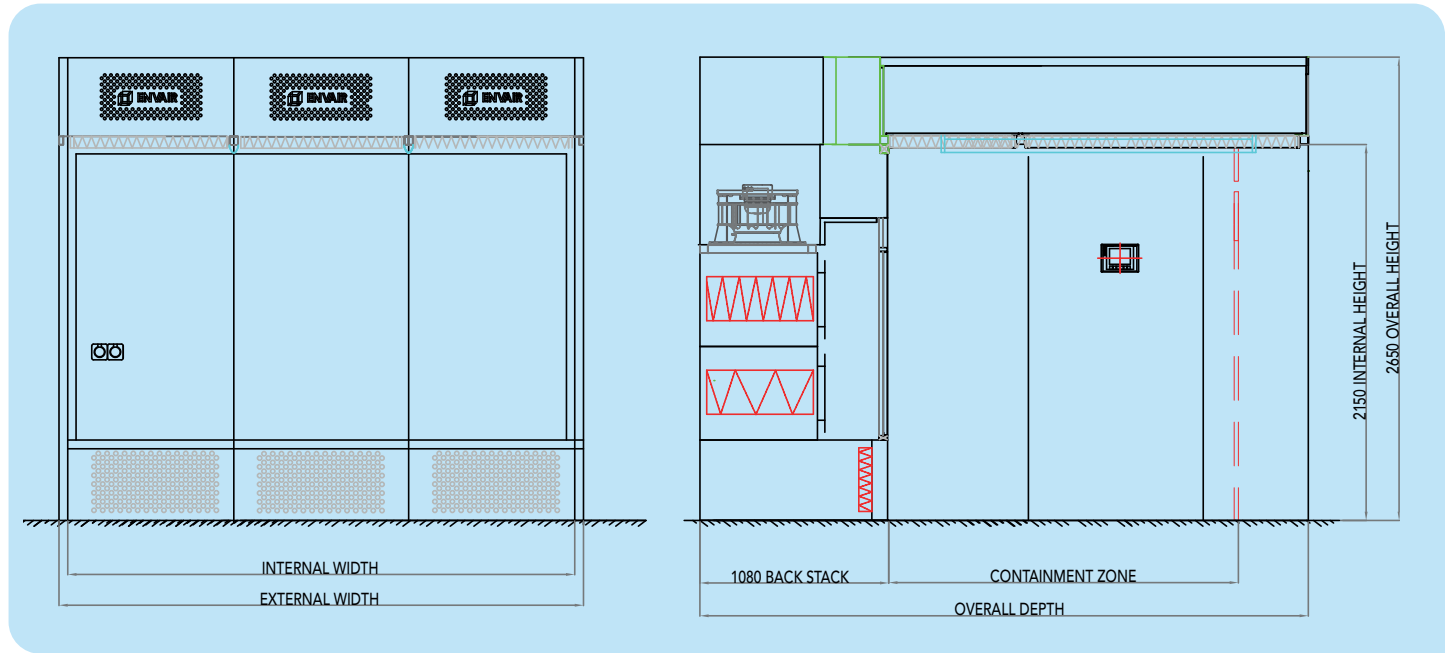

- Free-standing or floor mounted models available in a range of standard modular sizes, including 2.0m, 2.5m, 3.0m, 3.5m, 4.0m, 4.5m & 5m widths or bespoke sizing
- Safe change fine dust and HEPA filtration as standard with pre-filter upgrade available
- Choice of terminal HEPA filtration or PLF Screens for ceiling Downflow
- Robust, easy-to-clean panel construction from powder coated Zintec, 304 stainless steel or 316 stainless steel
- Recirculating airflow for powder handling applications or single pass airflow for hazardous solvent or vapour processes
- Energy efficient design using EC fan and LED lighting, with noise levels $<75\text{dBa}$
- Hazardous (ATEX) and non-hazardous area electrical upgrades available
- Siemens HMI control interface, display includes alarm conditions, filter health, Temperature & Humidity, standby & running
- Customisable internal fixtures including: electrical services, containment screen, mobile and fixed workbenches, pallet stop rails, PIR motion sensor, transparent sidewalls and additional ancillary drum tipping and lifting equipment
- Optional materials and personnel airlocks with rapid roller door and leaf hinge doors
- Optional cooling coil system to maintain the internal working area at a temperature of $21^{\circ}\text{C} \pm 3^{\circ}\text{C}$

Downflow Booth Range

FOR HANDLING FINE POWDERS

Clean Air & Containment

BOOTH SIZE	External Width (mm)	Internal Width (mm)
2.0m	2000	1900
2.5m	2500	2400
3.0m	3000	2900
3.5m	3500	3400
4.0m	4000	3900
4.5m	4500	4400
5.0m	5000	4900

All standard sizes have an overall height of 2650mm, with 2150mm internal height. The overall depth is 2680mm for 1200mm containment zones, 3080mm for 1600mm containment zones and 3480mm for 2000mm containment zones. We also offer bespoke sizing to suit the needs of your facility.

QUALITY STATEMENT

Envair Technology provides world class design and manufacturing expertise for a full portfolio of clean room and containment solutions. We work with healthcare, pharmaceutical and laboratory facilities around the world, to protect the safety of teams handling hazardous compounds and maintain product integrity. Our engineers and production team are committed to the highest standards of excellence, meeting the requirements of ISO 9001:2015. We provide a comprehensive maintenance, testing and parts service for all our products, to ensure a lifetime of trouble-free use.
